Badr Choubai

Denver, CO | github.com/BadrChoubai

Summary

Computer Science student at MSU Denver (B.S. expected May 2027) focused on backend and cloud engineering. Seeking internship and full-time opportunities in software development. Brings two years of professional experience at Beeline building and testing REST APIs and containerized services, with hands-on CI/CD across US and EU deployments. Planning to pursue the Certified Kubernetes Application Developer (CKAD) certification to deepen expertise in microservices and distributed systems.

Experience

Freelance | *Shopify Developer* January 2026 – Present

- Own a client's Shopify storefront end to end as the business owner's primary technical resource, from planning to release
- Research user flows and build new pages to improve the shopping experience
- Audit and remove legacy code, favoring built-in configuration over custom scripts to reduce long-term maintenance

Beeline | *Software Engineer (joined as Software Engineering Intern)* May 2022 – April 2024

- Promoted from Software Engineering Intern to full-time Software Engineer
- Built 4 endpoints of Beeline's public REST API that let customers' HR systems read contractor job requisitions from the Vendor Management System (VMS) and update their custom fields on them
- Implemented request-event webhooks that notify customer integrations when batched updates finish processing in a legacy back-end service, so their systems learn about changes without polling
- Supported CI/CD pipelines that deployed Docker-containerized API services to Azure across US and EU regions; wrote xUnit unit and integration tests for C#/.NET services and took part in code reviews
- Diagnosed and fixed an ASP.NET Core API defect where sort and filter query parameters were silently ignored by the underlying SQL query, by attaching the Visual Studio debugger to the IIS worker process and tracing state through the request pipeline

Metropolitan State University of Denver | *Content Management System Migration Specialist* March 2021 – May 2022

- Collaborated with stakeholders across all university departments to resolve content and structure gaps, optimizing navigation, clarity, and engagement
- Created training materials and video tutorials covering content management in WordPress for staff across every university department, ensuring long-term sustainability post-migration

Education

Metropolitan State University of Denver | *B.S. in Computer Science | GPA: 3.5 / 4.0* Expected May 2027

Major: Computer Science | Minor: Mathematics

Relevant Coursework: Software Development Methods and Tools, Networking and Distributed Computing, Computer Science Principles

Projects

badrchoubai.dev | *Personal Websites* github.com/BadrChoubai/badrchoubai.dev

- Consolidated three standalone sites (portfolio, bookshelf and a print-formatting tool) into one npm-workspaces monorepo with a shared Astro UI package, so header, footer and styles change across every site from one place

Skills & Capabilities

Technical: REST API development (C#, ASP.NET Core) · Docker and containerized microservices · CI/CD and automated testing (Azure, xUnit) · SQL and relational databases · TypeScript / JavaScript · Astro and Cloudflare Workers · AI-assisted development (Claude Code), applied selectively

Soft Skills: End-to-end ownership · Cross-functional collaboration · Clear written communication
